

Plumas National Forest Over-snow Vehicle Use Designation Project

Updated alternative maps using the Forest Visitor map

Updated alternative specific maps (1-6) using the Forest Visitor map were created and uploaded (11/2/2018) to the PNF OSV webpage:

<https://www.fs.usda.gov/detail/plumas/landmanagement/?cid=stelprdb5211065>. The Forest Visitor map provides townships, ranges, and sections; topography; roads and trails; and other helpful information for orientation on the Plumas National Forest.

The updated map file sizes are too large to publish to the project specific webpage via PALS (Planning Appeals and Litigation System). This document was uploaded to the project specific webpage (11/05/2018) providing the above hyperlink for the public to access the new updated maps. The project specific webpage is: <https://www.fs.usda.gov/project/?project=47124>. The DEIS, original alternative maps, and legal notice are stored and accessible at the project specific webpage under the “Analysis” tab.

Legend Descriptions

- **Open Areas:** distinct areas smaller than a Ranger District that contain NFS land designated for cross-country OSV use
- **Open to Over-Snow Vehicles 50 inches or less:** NFS land that is open to Class 1 OSVs that are 50 inches or less in width at the widest point on the vehicle
- **Open to all Over-Snow Vehicles (Groomed):** proposed OSV trails open to all OSVs (Classes 1 and 2) that are less or greater than 50 inches in width
- **Open to Over-Snow Vehicles 50 inches or less (Ungroomed):** proposed ungroomed OSV trails open to all OSVs (Classes 1 and 2) that are less or greater than 50 inches in width
- **Potentially Open to all Over-Snow Vehicles (Groomed):** proposed groomed (“potential”) OSV trails open to all OSVs (Classes 1 and 2) that are less or greater than 50 inches in width
